# Chancellor's Message to the Graduates

---

We are gathered here today to honor some 3,700 graduates from more than 200 fields of intellectual study.

You and your families should be extremely proud of the dedication and perseverance each of you has exhibited in order to be present here today. You selected a goal and stayed with it to successful completion. Congratulations.

The primary purpose of a university is to help individuals acquire the knowledge and skills to be capable of making sound judgments and contributing to the overall advancement of society. In particular, a university must work to create an environment conducive to the discovery, critical examination, preservation and transmission of knowledge, wisdom and values. Therefore, a university must be judged, not only by your accomplishments, which we honor today, but also by your success in working to improve the quality of life which ultimately ensures the survival of present and future generations.

As you embark on a new frontier of life, we hope you will maintain contact with your University. By your past experiences and valuable suggestions, we are best able to discover how to improve our service to the students who follow you, to the citizens of the community, the state and the nation.

This is the final commencement that I will preside over. It has been my pleasure during the past seven years to see many students complete their studies and move into society. It has been an honor to serve them and you as chancellor. Next year I will return to the faculty here at College Park.

Best of luck and every good wish for the future. We hope to hear from you often.

R.L. Gluckstern  
Chancellor

## The Graduates

The students graduating from the University of Maryland today follow in the footsteps of many notable UM graduates who have distinguished themselves in fields as diverse as science, the arts, entertainment, journalism, business, law, medicine and government.

Through Kermit the Frog, Miss Piggy, and others Jim Henson conveys a refreshing form of entertainment that touches the hearts of young and old alike. By the time he graduated from UM in 1960, Henson was developing successful TV commercials in the area. "The Muppet Show," created in 1976, is syndicated on about 125 stations in the U.S. and is seen in some 40 other countries.

The first woman elected to the Supreme Court of Michigan, Mary Stallings Coleman has been influential in developing many innovative programs for juvenile welfare. A 1935 Arts and Sciences graduate of UM, Coleman is a firm believer in rehabilitation and crime prevention and has established pre-court services for children in danger of becoming school drop-outs and education programs for underprivileged mothers in an effort to curb child abuse in Michigan.

Known as one of the youngest graduates of the University, Charles Fefferman received a joint degree in mathematics and physics in 1966 at age 17. One of the world's top mathematicians, Fefferman received the Fields Medal, the most prestigious award a mathematician can receive. He is currently a professor of mathematics at Princeton.

In the field of consumer affairs, UMCP graduate Meredith M. Fernstrom, rates as one of the nation's top experts on consumer issues. She is currently American Express Company's new Vice President for Consumer Affairs, and before that she served as the Special Assistant to the Secretary and Director of Consumer Affairs in the U.S. Department of Commerce.

Other outstanding UM graduates include Connie Chung, a 1969 journalism graduate, who anchors the news at KNXT-TV in Los Angeles; Carmen Balthrop, a Metropolitan Opera singer and 1971 UMCP Music Alumna; and Tom McMillen, a 1974 Arts and Sciences graduate and Rhodes Scholar, who is playing professional basketball for the Atlanta Hawks.

## The Campus

In enrollment, College Park is among the 10 largest campuses in the country. Undergraduates enrolled in spring 1982 numbered 27,540 and graduate students, 6,892 for a total enrollment of 34,432. This year's College Park operating budget is approximately \$196,635,052. The University assisted over 13,000 College Park students with financial aid in 1980-81.

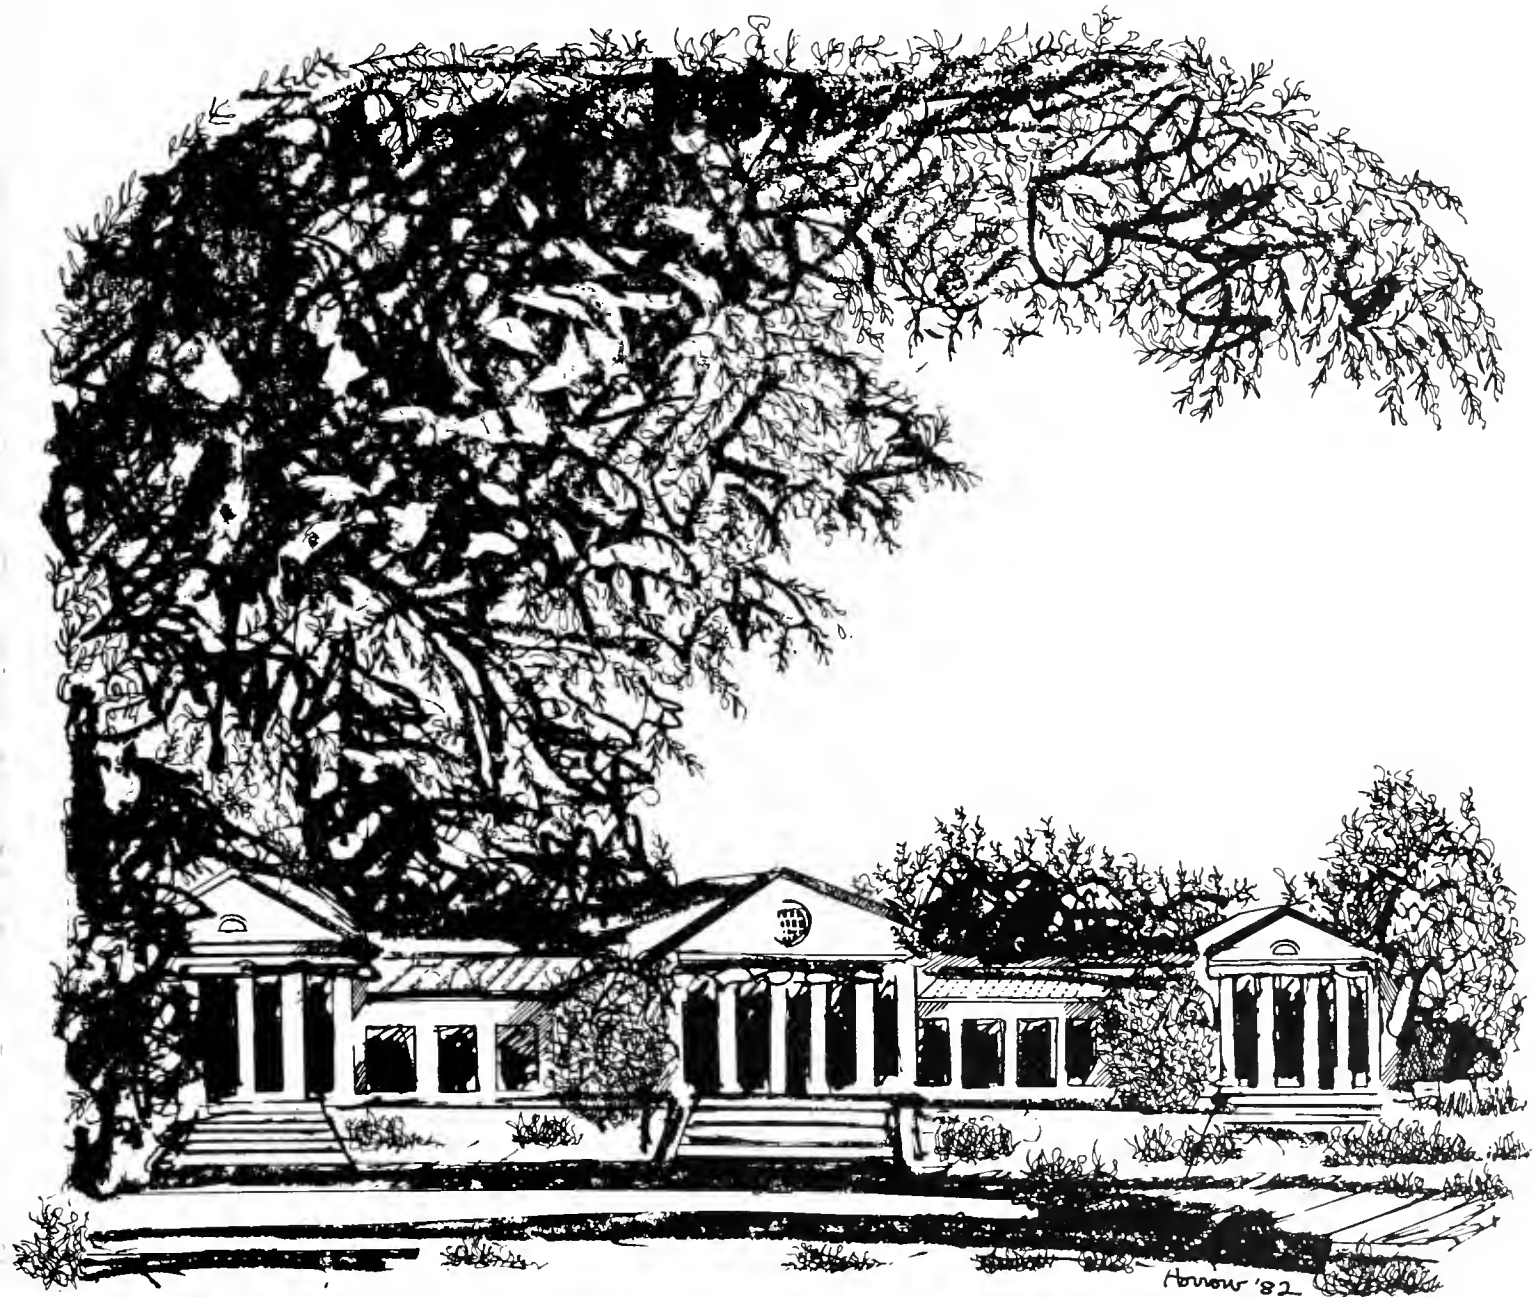

Students may choose from 115 undergraduate and 84 graduate programs leading to degrees. In 1980-81, a total of 5,616 undergraduate, 1,063 master's and 347 doctorate degrees were awarded by the College Park Campus. In the number of doctorates granted annually, the University ranks among the top 30 in the nation.

## History

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. When its name was changed to the University of Maryland five years later, it was given power to confer additional degrees. The first dental school in America, the Baltimore College of Dental Surgery, became a part of the University in 1840.

Subsequently, the University opened schools of pharmacy, law and nursing. Under a charter secured by a group of Maryland planters in 1856, the College Park Campus of the University, then called the Maryland Agricultural College, opened in 1859 and became one of the original land-grant schools in 1865. After a disastrous fire in 1912, the State acquired control of the College and bore the cost of rebuilding. In 1920, the State took over the faculty-owned University of Baltimore, merging it with the State-owned institution at College Park to form the present-day University of Maryland.

In 1886, the Delaware Conference Academy was founded by the Methodist Church in Princess Anne, Maryland. The State acquired this institution in 1948, at which time it became known as Maryland State College. It was made a campus of the University in 1970, and is known as the University of Maryland, Eastern Shore (UMES). The University of Maryland Baltimore County (UMBC) was opened at Catonsville in 1966.

## Libraries

University libraries include approximately 1.5 million volumes on the College Park Campus, 16,737 subscriptions to periodicals and newspapers, plus over a million microform units.

The Hornbake (Undergraduate) Library has a seating capacity of 3,600 students and is among the nation's largest. Facilities include color video-tape players and playback units, enclosed rooms equipped with instructors' consoles for the use of nonprint media materials, and wireless stereo headsets for tapes of lectures, plays, speeches and music.

## Research Facilities

Among the exceptional research facilities on Campus are: scanning electron microscopes; subsonic, supersonic, and hypersonic wind tunnels; laboratories for radiation research and biochemical reactions; a nuclear training reactor; an electron ring accelerator; complete laboratories for the dynamic studies of soils and structures; a unique facility utilizing satellite remote sensing data; a dynamic photomechanics lab; a precision encoder and pattern recognition device; a gravitational radiation detection system including a gravimeter and three retroreflector arrays on the moon; a psychopharmacology lab; rotating tanks for laboratory studies of meteorological phenomena; a linear accelerator; a high resolution spectroscopy facility; a laboratory for basic behavioral research; an assortment of computers; a computer vision lab; the Astronomy Observatory; a laboratory for plasma and fusion energy studies; remote sensing and cartographics labs; specialized sound chambers for audiology research; a criminal forensics lab and the Water Resources Research Center.

The College Park Campus also operates one of the largest and most sophisticated long-wavelength radio telescopes (located at Clark Lake, Southern California).

In addition to these research opportunities, programs in the behavioral sciences, social sciences and education exist in many bureaus and institutes including: the Bureaus of Business and Economic Research; Educational Research and Field Services; Governmental Research; and Institutes for Child Study; Criminal Justice and Criminology; and Urban Studies.

## Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States.

Each of the three academic degrees—bachelor, master and doctor—has its own distinctive gown and hood. The bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast, the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of the gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture/Maize  
Arts, Letters, Humanities/White  
Business Administration, Commercial Science/Drab

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

From Europe the use of academic degrees spread to English universities. Harvard University, the College of William and Mary, and Yale University followed the British pattern in the United States.

### **Academic Degrees**

The degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna (Italy) in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

### **The Doctor's Degree**

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, which received from the emperor the right of appointing doctores legum (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing doctors canonum et decretalium (teachers of the canon law), and when the study of civil law came to be combined with that of the canon law, the title was changed to doctor utriusque juris (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree and requires two to five years of study, the writing of a thesis, and the passing of written and oral examinations. The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioner's degree and the research type. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor and Doctor of Pharmacy. These degrees carry no implication of original research and are classified by the U.S. Office of Education, with bachelor's degrees, as the first professional degrees. The University of Maryland awarded the first two dental degrees in history, on March 9, 1841, and invented the name of the degree, D.D.S., as well.

The second type of doctor's degree is classified as the research doctorate representing prolonged periods of advanced study, usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States by Yale University in 1861.

The first Ph.D. was awarded by the University of Maryland in 1920.

---

### **The Master's Degree**

The master's degree is an academic honor conferred upon students who have successfully completed work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word magister, connected with a qualifying phrase, was used among the Romans as a title of honor, but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized facilities were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their courses of studies, for their diligence and knowledge, and had already received the degree of baccalaureate (bachelor) were called magistri artium (master of the liberal arts).

In 1920, the new University of Maryland awarded its first M.A. and M.S. degrees in fields other than agriculture.

### **The Bachelor's Degree**

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree, Bachelor of Arts, was the first conferred in America in 1642 on the first nine graduates of Harvard College.

Maryland Agricultural College, which was later to become the University of Maryland College Park, awarded the first Bachelor of Arts and Bachelor of Science degrees in 1862.

# John Brooks Slaughter

## Honorary Doctor of Science and Commencement Speaker

---

A fateful phone call from the White House two years ago had John B. Slaughter packing his bags in Washington—the state—for Washington, the nation's capital. Destination: The National Science Foundation. Position: Director.

Handpicked by then-President Jimmy Carter, the appointment of the Kansas-born scientist-educator won quick and sweeping approval from heavyweights both inside and outside NSF. But the strong backing and subsequent U.S. Senate confirmation on September 23, 1980 was small wonder. The first black to head a major federal science agency, Slaughter took the position with a portfolio already stamped with success.

A Ph.D. recipient in engineering physics from the University of California at San Diego, Slaughter's credentials were impeccable. From 1960 to 1975, he worked at the Naval Electronics Laboratory Center in San Diego, where he became head of Information Systems Technology Department and was named Scientist of the Year. In 1975, the University of Washington successfully recruited him as director of their renowned Applied Physics Laboratory. Under his leadership, the staff grew from 180 to 240 strong and maintained its competitive edge in the fields of underwater acoustics, underwater vehicles and physical oceanography.

While at the University of Washington, his work captured the attention of NSF which in 1977 appointed him assistant director for astronomical, atmospheric, earth, and ocean sciences.

After finishing his first tour of duty at NSF, Slaughter returned to the world of academe as the newly appointed academic vice president and provost at the smaller Washington State University.

Today, as NSF director, Slaughter finds himself heir to a host of formidable challenges—from bolstering the national scientific research agenda and upgrading science and engineering education to increasing the exchange of scientific information among scientists here and abroad. Underscoring each of these challenges is Slaughter's overall commitment to widening opportunities for minorities in science, engineering and technology.

Today he is awarded an Honorary Doctor of Science.

*Stephen A. Darrow '82*

# Robert K. Merton

## Honorary Doctor of Laws

---

A profile appearing in *The New Yorker* reported that Robert K. Merton's admirers hailed him as "a formidable role-model" for the young starters in his profession. Other colleagues, too, have showered him with unqualified endorsements. And even a critic sourly conceded that Merton is "a prestige symbol," echoed by all factions of modern sociology.

Indeed, Robert K. Merton, acclaimed sociologist and Columbia University professor emeritus and special service professor, is all this and more.

Born in Philadelphia, Pa., the son of working-class, Jewish immigrant parents from eastern Europe, Merton began his college life as a philosophy major at Temple University but soon converted to the study of sociology and became a well known defender of the field as a genuine science.

From such distinctly different subjects as bureaucratic structure to the effects of radio propaganda, scores of Merton's articles and books have become the foundation in both the texts and the footnotes of hundreds of technical writings by others.

Says one literary scholar, commenting on Merton's *Sociological Ambivalence and Other Essays*, ". . . His book will profit almost anyone who troubles to peruse it with a modicum of interest and intelligence. It will help to give sociology the good name it deserves." The entire career of Merton amply supports this statement.

Immediately after receiving his M.A. and Ph.D. from Harvard, Merton began teaching at his alma mater. But that was just the beginning of a career that has consumed some 46 years of distinguished scholarship ranging from a Fulbright lecturer at the University of Kyoto in 1967 and AAAS' Phi Beta Kappa-Sigma Xi lecturer to distinguished lecturer at National Institutes of Health, The Johns Hopkins University and Cornell Medical School, to name but a few.

His work has earned him numerous distinctions, among them the presidencies of several associations including the American Sociological Society; honorary degrees from well over a dozen universities as well as a Guggenheim Fellowship and the American Council of Learned Societies' Prize for Distinguished Scholarship in the Humanities in 1962; appointment as a Fellow of the Center for Advanced Study in the Behavioral Sciences and Institute of Medicine, National Academy of Sciences in 1973.

In addition, he is a member of American Academy of Arts and Sciences, American Philosophy Society, World Academy of Art and Science and Foreign Member of the Royal Swedish Academy of Sciences.

On the advisory committee of the Alfred P. Sloan Foundation's Program of Science Books since 1978, the articulate educator-sociologist continues to deeply influence generations of social scientists at home and abroad.

His admirers endearingly call him "a sociologist's sociologist" and "Mr. Sociology". Tried but nonetheless true cliches. For Robert K. Merton is all this and more.

Today he is awarded an Honorary Doctor of Laws.

*Stephen A. Daron '82*

# Katherine Paterson

## Honorary Doctor of Letters

---

Between the covers of Katherine Paterson's books is a world of wit, compassion and love, just waiting to be discovered by the eyes of the young.

On the covers are her seals of success—two prestigious National Book Awards, the first in 1977 for *The Master Puppeteer* and the second in 1979 for *The Great Gilly Hopkins*; two Newbery Medals, in 1978 for *Bridge to Terabithia*, and just last year for *Jacob Have I Loved*. Other citations include an Edgar Allan Poe Special Award and several American Library Association Notable Book designations, the first in 1974 for *Of Nightingales That Weep*; the Christopher Award in 1978 and U.S. nomination for Hans Christian Andersen Award the following year.

Since she was a small child, Katherine Paterson has been making up stories. Stories that make you laugh. Stories that make you cry. Stories that make you love.

And it's by no accident that the heartbeat of a good many of the tales she spins comes from Paterson's own personal experiences.

Born in pre-World War II China, Paterson was the middle child of five in a missionary family that twice was forced to return to the U.S., where time and time again she felt the scorn of schoolmates taunting and teasing her because they knew she had been born somewhere in the Orient.

Despite the alienation she sensed in school, Paterson excelled in her studies, graduating summa cum laude from Tennessee's King College and later receiving her M.A. in 1957 from the Presbyterian School of Christian Education in Virginia.

Though she well remembered her childhood fear of the Japanese while living in China during tumultuous times, Paterson decided to do postgraduate work in the Kobe School of Japanese Language and later worked as a Christian educator in a rural area of the country.

A fellowship to Union Theological Seminary lured Paterson back to New York where she met her husband, John, whom she calls her "chief critic and warmest supporter."

It was after moving to Takoma Park, Md., to raise four children that Paterson began creating her award-winning books. As Virginia Buckley, her editor, has said: "She wanted to have something at the end of the day which had not been eaten up or dirtied up or torn apart."

Wife of a minister, mother of two boys and two adopted daughters, much of Paterson's book material is inspired by her family life. Several of her books borrow from her days in the Orient.

Indeed, no scene or character seems immune to the wonderful magic of Paterson's imagination.

A sampling: In *The Master Puppeteer*, a friendship of two boys, both not unlike her older son John. In *The Great Gilly Hopkins*, a poignant story about a child's desperate search for a place to call home, which in 1980 was televised by CBS. And more recently, in *Jacob Have I Loved*, a story of an elder twin's lost birthright set on the islands of the Chesapeake Bay.

Today she is awarded an Honorary Doctor of Letters.

# Candidates for Degrees

The 1982 class roster comprises degree candidates from the undergraduate and graduate programs at the University's College Park Campus. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The University reserves the right to withdraw or add names. All diplomas will be mailed by the Registrations Office.

Students who have earned their degrees from the College of Education may obtain a Statement of Certificate Eligibility in the College of Education, Student Services Office (Room 1210). Other students who have completed teacher education programs will receive their statements in the mail (separate from the diploma) upon verification of required coursework.

# Scholarship Honors

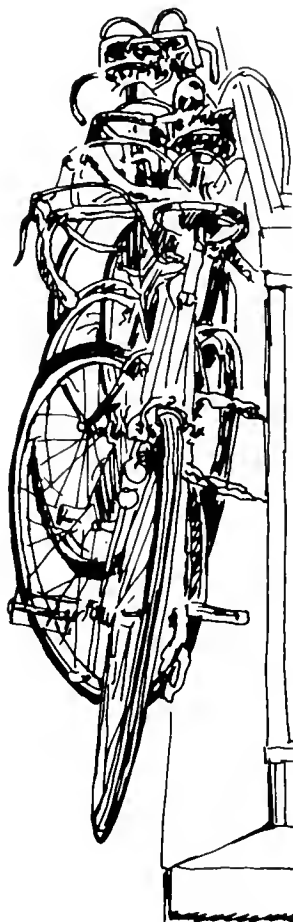

Candidates for bachelor's degrees who have earned honors of scholarship upon graduation are indicated in the alphabetical listings of Divisions, Colleges or School. To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed two years of work at the University of Maryland (60 semester hours, 30 of which were at College Park) and (2) have a scholastic average of B (Grade Point Average of 3.000) or higher in University of Maryland work prior to the last semester of registration before award of degree.

May 1982 candidates who meet these criteria are shown in the alphabetical lists as qualifying, upon graduation, for the designations "Summa Cum Laude" if they ranked in the top two percent of the candidates in their respective Divisions, Colleges or School; "Magna Cum Laude," if in the next three percent; or "Cum Laude," if in the next five percent, based on the grade point average of students in the preceding three graduating classes.

## ALPHA PHI SIGMA (Criminal Justice/Criminology)

National honor society for students of criminal justice. The society recognizes scholastic excellence by undergraduate and graduate students. Requirements for acceptance are a 3.0 overall grade point average and a 3.2 in criminal justice coursework. The Omega Iota chapter of Alpha Phi Sigma serves as a forum for information exchange between students, faculty members and local criminal justice agencies and provides extra-curricular learning opportunities.

# A Walking Tour through the College Park Campus

There are many interesting educational and research facilities on the College Park Campus. We have selected some of these that you may wish to visit along a walking tour. These facilities are open on weekdays from 8:30 a.m. to 4:30 p.m., except where noted. You are welcome to tour them at your leisure. Other points of interest on campus may be toured by appointment through the phone extension listed after each facility. For general information, call the Student Union Information Center (454-2801).

## Highlights

**MEMORIAL CHAPEL** — (BLDG. 009) Regents Drive. A schedule of multid denominational services can be obtained in the North Administration Bldg.

**NORTH ADMINISTRATION BUILDING** - (BLDG. 052) Regents Drive. This facility houses the Admissions Office of the University; Office of the Registrar for graduate transcripts and commencement information; and offices for student financial aid, housing, and campus employment.

**HORNBAKE LIBRARY** — (BLDG. 147) Corner of Regents and Campus Drives. Completed in 1973, the library is one of the finest in the nation. In addition to serving undergraduate students, it also houses at the graduate level the College of Library and Information Services.

**MARYLAND STUDENT UNION** — (BLDG. 163) Campus Drive. A new addition to the Student Union was completed in 1972. You can obtain a building directory and schedules of events and activities at the information desk in the front lobby. Guided tours are available (with one day's notice) to the bowling alleys, billiard room, ballroom, cafeterias, motion picture theatre, and exhibits.

**COLE FIELD HOUSE** — (BLDG. 162) Campus Drive. With a seating capacity of 14,500 the Arena of Cole Field House is used for basketball games, classes in physical education, commencements, concerts, academic testing, track, and many other indoor activities. Other areas of the building contain small gymnasiums, a swimming pool, classrooms,

faculty offices, a ticket booth for athletic events, and the Department of Intercollegiate Athletics.

**TAWES FINE ARTS CENTER** — (BLDG. 141) Campus Drive. Offices of the departments of communication arts and theatre and the department of music are housed in this building. University Theatre is also located here, adjacent to Parking Lot #1.

**SCHOOL OF ARCHITECTURE BUILDING** — (BLDG. 145) Campus Drive. You are invited to walk through this facility and view displays of student architectural designs and the faculty-designed sculpture in the West Court.

**CENTER OF ADULT EDUCATION.** The Center of Adult Education is a residential conference facility for continuing education for adults. Call 454-4158.

**THEODORE R. McKELDIN LIBRARY.** McKeldin contains materials for the use of graduate students and faculty as well as undergraduates. (Ext. 5704).

**BYRD STADIUM.** Football games, lacrosse games, and track and field events are held in this stadium which holds 45,000 spectators. (Ext. 4705)

**ASTRONOMY OBSERVATORY.** Open House is held on the 5th and 20th of each month at 8:00 p.m. E.S.T. for the general public. Large groups may call for reservations at 454-3001.

**ROSSBOROUGH INN.** The oldest building on the College Park Campus is open to the public for lunch, Monday through Friday, from 11:00 a.m. to 2:00 p.m. (Ext. 3940)
